# Women Writers Project Accessibility Conformance Report

## WCAG Edition

(Based on VPAT® Version 2.5Rev)

### Name of Product/Version:

Women Writers Online (WWO)

### Report Date:

December 16, 2025

### Product Description:

Women Writers Online is a full-text collection of early women's writing in English, published on the internet by the Women Writers Project at Northeastern University. It includes full transcriptions of texts published between 1526 and 1850, focusing on materials that are rare or difficult to obtain.

The WWO interface is a browsable and searchable collection of documents. Each document is able to be opened in a Reader page. The main components of each page are these:

- A sidebar for user controls, including basic and advanced search of the WWO corpus.
- On the search page:
  - Filters for selecting subsets of interesting documents;

- The “Results” pane, which links to every document in WWO that matches any standing search or filter request; and
- The Timeline visualization, which dynamically shows the original publication dates of all WWO documents listed in the Results pane.
- On each document’s page:
  - Preferences for modifying the display of the document content;
  - The “Context” pane, which includes a sample citation for the work, metadata about the original publication, and any keywords-in-context from performing a search; and
  - The “Reader” pane, which displays an HTML representation of a transcribed document.
- Dialogs can be opened for “Feedback”, “Advanced Search”, and to access notes within WWO documents.

WWO does not include audio or video content. The platform contains few images, limited to:

- icons for several user controls; and
- the Timeline, rendered as SVG with text descriptions.

Where images appeared in the original documents, those images are represented *only* by textual descriptions, written in modern language by the transcribers.

## Notes:

Several WCAG criteria are marked “Supports,” following VPAT instructions and the [WCAG 2.0 Guidelines](#), which indicate that “if there is no content to which a success criterion applies, the success criterion is satisfied.” In this Accessibility Conformance Report (ACR), we include a note when we support a success criterion in this way.

This ACR was filled out on the occasion of a new version of Women Writers Online, which includes a number of fixes to inaccessible content. This report supersedes the ACR published in July 2025. It will likely be updated again in 2026.

To see our latest accessibility statement and evaluations, please visit the WWP's [Accessibility page](#).

## Evaluation Methods Used:

Most criteria were evaluated through a manual review of the WWO interface, using:

1. mouse for interaction,
2. keyboard for interaction, and
3. Firefox developer tools to replicate CSS customization, as well as to check contrast, component roles, and labels.

In addition, Women Writers Online was checked for errors using the [WAVE Evaluation Tool for Firefox](#) at version 3.2.7.1.
